

WEIGHT-LOSS CLOTHING MADE FROM FABRICS MIXED WITH NEOPRENE AND BIO-CERAMICS

Abstract of Disclosure

The present invention is a Weight-Loss Clothing made from Fabrics mixed with Neoprene and Bio-Ceramics which is designed to reduce the weight of users. In order to achieve the objective of the present invention, the present invention comprises an outer layer made from spandex, a medium layer made from anti-bacterial neoprene and bio-ceramics and an inner layer made from polyester, or cotton, or nylon. Unlike other sportswear or exercising clothing of the same kind available on the market, the present invention provides an excellent weight-loss effect and a good feeling and protects the user's skin from allergy and effectively discharges the sweat of the user out of the present invention.
